Allowable subject matter

Claims 1-4, 7-11, 14, 17 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations, in combination of the remaining elements on the independent claims 1, 8, 17:

- An inverter circuit configured in operative connection with the DC bus and with lamp input line, configured to generate an asymmetric alternating current on the lamp input line, the inverter circuit being connected directly the lamp input line, wherein the asymmetric alternating current, generated directly on the lamp input line, is provided to a fluorescent lamp being in operative connection with the fluorescent lamp line to eliminate visual striations otherwise occurring in the lamp such as required by claim 1;
- Inverting the DC voltage to produce an asymmetric alternating current directly on a lamp input line; and supplying a gas discharge lamp with the asymmetric alternating current in operative connection with the lamp input line to eliminate visual striations otherwise occurring in the lamp such as required by claim 8;
- An inverter circuit configured in operative connection with the DC bus and with a lamp input line, configured to generate an asymmetric alternating current on the lamp input line, the inverter circuit being connected directly to the lamp input line, wherein the asymmetric

alternating current, generated directly on the lamp input line, is provided to a fluorescent lamp being in operative connection with the fluorescent lamp input line to eliminate visual striations otherwise occurring in the lamp such as required by claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
